

# WEDAC<sup>®</sup>

## Acid Cleaner and Descaler

### FEATURES/BENEFITS

#### Features

- Highly concentrated
- Very low vapor pressure
- Eliminates butyl cellosolve, a VOC found in similar products
- Little or no odor
- Contains no muriatic acid
- Free rinsing

#### Benefits

- Very cost effective
- Safer to personnel & the environment
- Reduces reporting
- Reduces waste generation and disposal costs
- Pleasant to use

*Wedac* is available in 4 x1 gallon cases and 50 gallon drums.

### Description

*Wedac* is an acid containing detergent that cleans, derusts and descales. *Wedac* contains a stable inhibitor which provides effective protection on most metals and many other surfaces. *Wedac* can be used at any strength in dip, brush or wipe-on methods.

*Wedac* is ideal for prepaint treatment of metal surfaces, and has hundreds of other uses. *Wedac* can be used to brighten aluminum and stainless steel, clean radioactive contaminated equipment, clean tile and grouting.

*Wedac* has rapid wetting and penetrating action providing faster rust and corrosion removal than other commonly used acids. Stable for use over a wide range of temperatures, *Wedac*'s special inhibitor does not precipitate out and become inactive even after large amounts of rust and corrosion have been dissolved.

*Wedac* rinses freely, and contains no muriatic acid.

*Wedac* solutions are not recommended for cleaning galvanized, chrome, nickel or tin-plated metal. Caution is called for when using *Wedac* on aluminum parts.

**IMPORTANT:** Before using WEDAC, always be sure to read and follow precautions and directions for use appearing on the product container label and MSDS. (Apr04)
